

Stop **Don't Give Anticommunism a Chance!**

We are democratically minded people of different political directions. Anticommunism is deeply anti-democratic. It defends capitalism with all its consequences as "without alternative". It aspires to tame social protest movements and antifascist resistance in conformity with the system. Especially now, when more and more people around the globe are searching for and discussing a societal form alternative to capitalism, anticommunism is being fueled again. It aims at legitimizing right-wing governments and their political practice and so gives ultra-reactionaries and fascists enormous tailwind.

We say NO!
